Quantitative Developer | Trading Systems | Market Making | Python

Quantitative Developer with hands-on experience building and operating **live market-making infrastructure**, trading analytics, and **risk management** systems. Experience launching and monitoring **production trading strategies** across spot and perpetual futures markets while developing tooling for **exposure management**, **execution quality**, and automated risk controls.

Work Experience

Quantitative Developer (Market Making)– Supex Technologies

12/2025 – 06/2026

- ❖ Developed and supported **live market-making and hedging strategies** across Binance and OKX.
- ❖ Built distributed monitoring infrastructure across **7 production VMs** monitoring **100+ instruments**, reducing incident detection from minutes to seconds.
- ❖ Designed **portfolio-level risk monitoring** tools tracking **spot and perpetual** exposure across **multiple exchanges** with **real-time alerting**.
- ❖ Implemented analytics for hedging performance, inventory management, and execution quality.
- ❖ **Parallel SSH polling system** for real-time multi-host visibility.
- ❖ Slack & Teams alerting: delta, gross exposure, engine failures, disk, connectivity.
- ❖ Log analysis tooling for trade lifecycle tracing across distributed systems.

Trading Operations & Liquidity Specialist – Tradu (ex. FXCM)

12/2024 – 12/2025

- ❖ Python monitoring & reconciliation **tools for trading systems and exchange APIs**
- ❖ Trade lifecycle + PnL dashboards improving execution visibility
- ❖ Liquidity and execution quality analysis across venues
- ❖ **Automation of operational** workflows and data integrity improvements

Trading Systems Engineer – RavenDAO (start-up; market-maker; 4month contract)

08/2024 – 12/2024

- ❖ **Async trading** systems and execution modules (asyncio, ZeroMQ)
- ❖ Developed a **Python SDK** for Perennial (DEX), integrating **smart contract interactions** and trading components.
- ❖ **On-chain monitoring** pipelines and trading data ingestion
- ❖ Order book and protocol analysis for strategy development

Data Analyst (Trading Operations) – Alaric Securities

12/2021 – 08/2023

- ❖ Built and optimized **data pipelines** and automation scripts (Python/VBA/SQL) for trade reconciliation and settlement.
- ❖ Performed **pre- and post-trade reconciliations** ensuring compliance with **MIFIR** regulations.
- ❖ Conducted root cause analysis on **transaction and position discrepancies**, improving reporting accuracy by 30%.

Inspector Banking Supervision - Bulgarian National Bank

12/2020-06/2021

- ❖ Carrying out supervisory inspections in credit institutions to comply with AML and ATF Measures Acts.
- ❖ Collaboration with ECB to develop and implement guidelines, technical standards and positions.

Education

- ❖ BSc (Hons) Finance & Investment Banking – University of Greenwich (UK) 2015-2019
- ❖ Sofia High School of Mathematics (A)– Diploma of Completed Secondary Education 2005-2012

Skills, interests and achievements

- ❖ Market Making | Delta Hedging | Perpetual Futures.
- ❖ Python | Java | Rust | Asyncio | ZeroMQ | LLM-assisted Software Development
- ❖ REST | WebSocket | APIs | Linux | PostgreSQL | MongoDB | DuckDB | Git | Docker
- ❖ Taekwondo WTF, champion of Bulgaria and 2nd in Europe(2010).
- ❖ Mathematic Olympiads – Gold and silver.
- ❖ Problem solver and exceptionally quick learner.
